

SOUTHCOAST MASSACHUSETTS

is designed for biotech industry success

SouthCoast Massachusetts brings together everything that biotechnology and bioengineering companies, large and small, need for development and commercial success. Business-minded communities provide needed public services, streamlined permitting and hands-on assistance with financial incentives and access to business and technical support services. SouthCoast Massachusetts

has the real estate, millions of gallons of available water, skilled workers, tax incentives and overall quality of life that biotech businesses need.

Available skilled workforce

- SouthCoast colleges & universities produce 15,000+ grads annually
- Over 50,000 high-tech workers live in SouthCoast
- Outstanding regional technical workforce training programs

Critical market access

- Central location with excellent highway infrastructure
- Access to three major airports linked to all domestic & international markets
- Business parks with proper zoning & innovative Research & Development overlay districts to accommodate biotech companies

Innovative financing & incentives

- Streamlined permitting and financial incentives
- State-funded Research & Development tax credits
- Workforce Training Grants to qualified businesses

Intangibles that define a good quality of life

- Miles of beaches for sailing, fishing, surfing and more
- Treasure trove of historic sites
- Excellent schools plus museums, festivals, charming towns
